

SPORTIME PEP GRANT EQUIPMENT OPTIONS

To better assess you with your 2009 PEP Grant Application, we would like to offer you information about additional products that can complement a MyStationPE.com Implementation.

Please contact Aaron Hart of Sportime for further information or assistance with these or any other Sportime products. Aaron Hart – ahart@sportime.com

HEART RATE MONITORING OPTIONS – SUUNTO GROUP HRM SYSTEMS

Monitor and manage workout intensity of up to 42 students at the same time, in real time. Each student wears an interference-free chest transmitter belt which sends live heart rate data to the Team POD. The Team POD is connected by a USB port to a laptop PC which is running Suunto Team Monitor software. The live monitoring and recording begins and with the use of a projector the entire class can easily utilize the color-coded Heart Zone information.

Using the Suunto Group HRM System, each student’s work output and efficiency is guided by real-time Heart Zone information. When class is over each student’s data is automatically named, saved and stored in their personal files with just two mouse clicks. This gives students a self-directed tool that will provide instant, physiological feedback on the effectiveness of their work.

Sportime PEP Equipment Proposal: Suunto Group Heart Rate Monitoring Systems

Total Package \$7,918.88 Per Site
